As 2019 draws to a close, we invite you to join a selected group of TOP **LEADERS** at our special end of the year event: **AMROP LEADERS TALK 2019**.

The event will present **LEADERS** with the latest findings on neuroscience impacts on the leadership field. We will discuss how to overcome bias we are all unaware of and what needs to be learned with regard to our brain to perform at the high level.

We live in the Imagination Age where creativity and imagination is a driving force behind creating an economic value. Introducing a new model in leadership, one that is based on latest neuroscience findings allows us to start a different leadership conversation, one that addresses the needs and desires of the human behind the leader and how he needs to work with his own brain to be the best version of own self every day.

The guest speakers will be **Igor Šulik**, Managing Leadership Partner, AMROP Jenewein & i4 Neuroleader Master Trainer in Europe and **Aljoša Valentinčič, PhD**, Full Professor, School of Economics and Business.

We warmly invite you to join us at this SPECIAL event for **LEADERS** to explore the hidden leadership capabilities of our brain.

Marko Mlakar
Managing Partner Adriatic
